

Harshita Grover

(+91) 9811225678 — harshitag1262@gmail.com — [LinkedIn](#) — Gurugram, India

Education

Manipal University Jaipur

B.Tech CSE

Class XII (ISC): 90.4%

Class X (ICSE): 90.8%

2023–2027

CGPA: 9.08/10 — 4× Dean's List

2023

2021

Experience

SHARP India — IT Intern (ERP)

Ongoing

Gurgaon, On-site

- Interning with SHARP India, a Japan-headquartered multinational, gaining hands-on exposure to enterprise systems and ERP processes
- Building SITMS (SHARP India Ticket Management System) while learning ERP workflows and enterprise IT operations

PwC India — Salesforce Trainee

Feb 2026 – Jun 2026

- Ongoing Training in Salesforce CRM, Apex, and enterprise cloud workflows; working with Java, Generative AI, PostgreSQL, MongoDB
- Analyzing business workflows, backend systems, and AI-driven automation in consulting environments

Infidelta Technologies Pvt. Ltd. — Web Developer Intern

May 2025 – Jul 2025

- Developed and customized Drupal CMS modules using PHP for content management and workflow automation
- Improved backend architecture and explored Generative AI/GAN concepts in enterprise applications

Deloitte Capstone Project — Finalist (Top 10 Teams)

2025

- Built AI-powered healthcare solution for Alzheimer's patients focusing on safety and assistance
- Presented to Deloitte experts; recognized for innovation and real-world impact

Projects

AI-Based Alzheimer's Assistance System

[Deloitte Capstone]

Flutter, FastAPI, Firebase, Oracle, WebSockets, ML Kit, TensorFlow Lite, Whisper, LLM

- Built a full-stack Flutter + FastAPI app with real-time WebSocket communication, ML Kit/TensorFlow Lite face recognition, and Whisper-based voice interaction for hands-free accessibility
- Developed an LLM-based assistant for reminders, task guidance, and live-location caregiver communication

Smart Attendance System using Computer Vision

OpenCV, Haar Cascade, EAR, Machine Learning

- Built a real-time facial recognition attendance system with automated detection/logging and EAR-based liveness detection to prevent spoofing via images or videos

NLP Sentiment Analysis and Word Embedding

Python, NLTK, Scikit-learn, Gensim, TF-IDF, Word2Vec

- Built an end-to-end NLP pipeline (preprocessing, TF-IDF, SVM/Logistic Regression/Naive Bayes); improved accuracy from 73% to 90%+ via hyperparameter tuning

Legal Document Assistant using LLM

Streamlit, DistilBART, NLP

- Built an LLM-based legal document summarizer using DistilBART with chunking for large inputs; evaluated via ROUGE and deployed through an interactive Streamlit UI

Technical Skills

Languages: Java, Python, C, SQL, PHP (OOP + Data Structures)

AI / ML: ML Algorithms, Generative AI, NLP, Computer Vision, LLMs, OpenCV, Face Recognition, Speech Processing

Frameworks: Flutter, Streamlit, Drupal CMS

Databases: MySQL, MongoDB, Oracle, PostgreSQL

Tools: Git, VS Code, Android Studio, XAMPP, phpMyAdmin, WebSockets, $\text{\LaTeX}$

Certifications

Data Structures and Algorithms (NPTEL), **Object Oriented Programming in Java** (GeeksforGeeks), **Retrieval-Augmented Generation (RAG)** (IBM), **AI For Everyone** (DeepLearning.AI), **Database Management System** (Oracle)
